

## Looky 10

### Handheld Video Magnifier

**High-definition magnification with large screen**

The Looky 10 is the largest-screen handheld device on the market, and for a price lower than many 7-inch models. Looky 10 has a large enough screen to replace most uses of a desktop magnifier, for a much lower cost and in a very compact size.

Looky 10 is also 1080p full HD, for a crystal-clear image, both on your desk and at a distance. Read signs at coffee counters and other such tasks with the distance view feature. Examine photos or reading materials with the close view feature. And even do your hair or makeup with the mirror/self-view camera that faces you.

#### About the Looky 10

**Introductory Price: \$1,299**

- 10 inch full HD display
- 1080p full HD image resolution for reading and distance
- Magnification of 2.5x to 18x
- Close view, distance view and even mirror/self view
- Live panning - explore live, zoomed images without moving the device
- Connects to a TV for larger viewing
- Photo mode and 18 high contrast modes
- Tactile, high-contrast controls to make it easy to use
- Continuous use up to 3 hours - user rechargeable battery
- Fold-out, integrated stand provides a proper angle for reading and writing
