

## **VP Columbia** Braille Embosser Tractor-Fed Embosser

Get fast, reliable braille with the VP Columbia! Embossing at 120 CPS this double-sided embosser gives you Library of Congress standard braille with the highest-resolution tactile graphics!

### **High-Resolution Tactile Graphics**

The VP Columbia offers high-resolution tactile graphics. With 8 different distinctive dot heights users can transform images into readable tactile graphics. The dot height is automatically adjusted based on the visual color of the image. The darker the color the higher the dot and the lighter the color the lower the dot making it easy for users of all skill levels to make custom tactile graphics.

The eight different dot heights also allow you to add more details to images and diagrams. You can easily make a map more readable by filling the interior state or country with a low dot height or pattern while leaving lakes or bodies of water with no fill for enhanced readability.

### **About the VP Columbia**

**Price: \$2,995.00**
