

VP SpotDot

ViewPlus Braille Printer

The Worlds Only Color Ink & Braille Embosser

Add color ink to your braille documents!

The VP SpotDot combines braille, tactile graphics and color ink all on the same page making it the perfect classroom solution!

High-Resolution Tactile Graphics

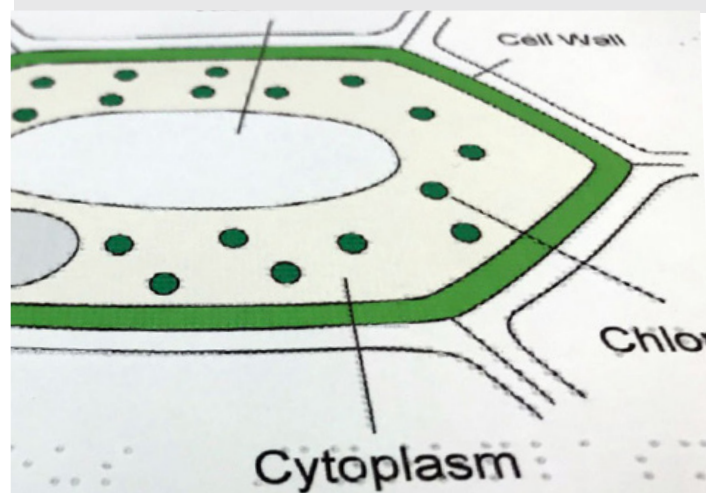

The VP SpotDot offers high-resolution tactile graphics. With 8 different distinctive dot heights users can transform images into readable tactile graphics. The dot height is automatically adjusted based on the visual color of the image. The darker the color the higher the dot and the lighter the color the lower the dot making it easy for users of all skill levels to make custom tactile graphics.

The eight different dot heights also allow you to add more details to images and diagrams. You can easily make a map more readable by filling the interior state or country with a low dot height or pattern while leaving lakes or bodies of water with no fill for enhanced readability.

About the VP SpotDot

Price: \$7,995.00

- 50 characters/second – single-sided braille
- The highest resolution tactile graphics – 8 dot heights
- Prints braille and color ink on the same page
- Formats Word and Excel documents for braille automatically
- Creates raised visual images on paper from anything on the screen
- Cut-sheet paper – use all types of media
- Use braille paper, copy paper, Avery labels & business card templates
- Uses the same paper and ink cartridges as an HP printer
- Braille and tactile graphics software included

Braille & Tactile Graphics Software Included

Tiger Software Suite is your complete solution for producing braille and tactile graphics. It makes it easy to get accurate braille translation in seconds. Insert text and graphics within familiar programs such as Word and Excel and translate with the touch of a button. It's great for users of all skill levels!

Fast, Local Support & Training
