

Adding a Contact to Your Smartvision2

This is a short guide describing how to add a contact to your Smartvision2. Please note that you will need to be signed in to a Google account to fully complete these steps.

- 1) Press the Home Screen key, located off the top left corner of the raised ring directional pad
- 2) Navigate down to “Contacts”
- 3) Press the OK button

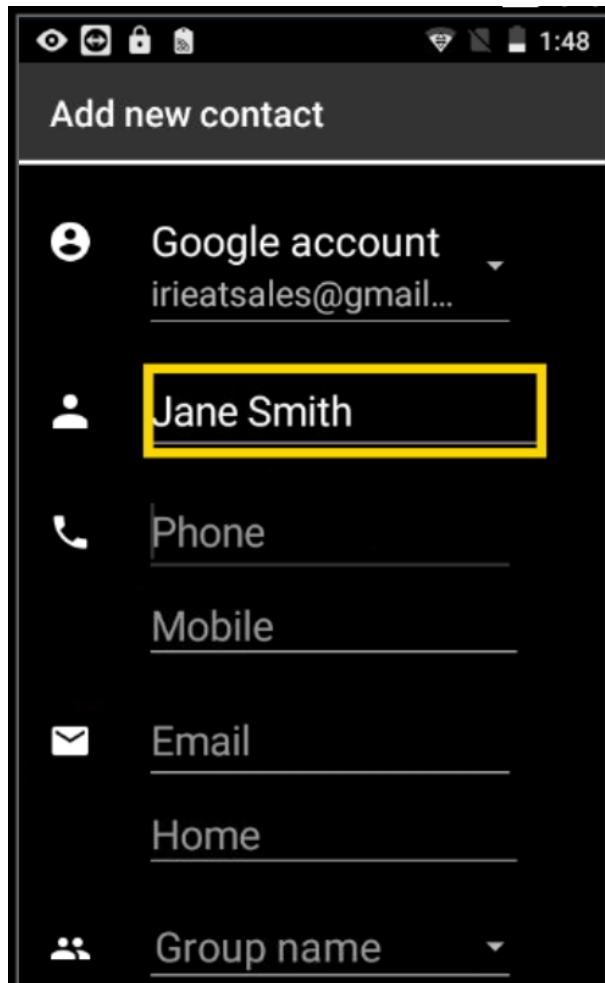

- 4) Navigate down to “Create new contact”
- 5) Press the OK button

- 6) Arrow up once. If this option reads “Phone Contact”, press the OK button and arrow down to “Google Contact”. If it is already set to “Google Contact”, leave it set to that and navigate back down
- 7) Press the OK button while the Name box is selected, and type in the contact’s first and last name, then press the OK button when finished

- 8) Arrow down to Phone, press OK, type in the contact's phone number, and then press OK again

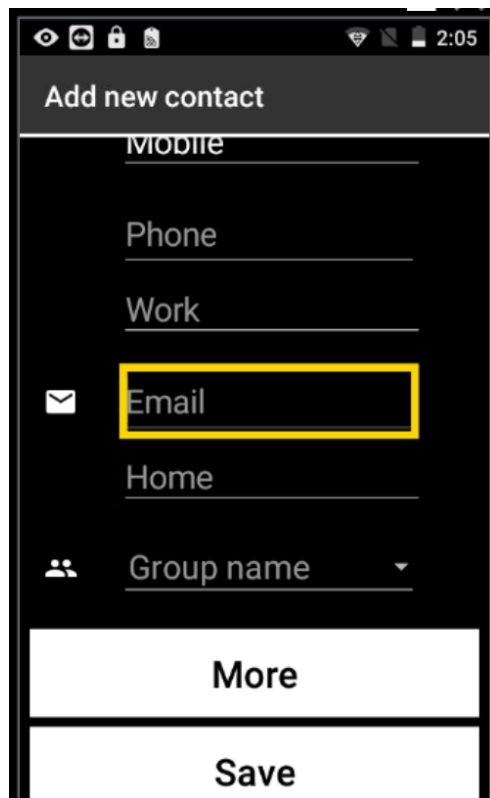

- 9) Navigate down to the drop down list below the phone number. This is the label for the number you just entered, indicating the type of phone number it is, and it will be set to Mobile by default. If the number you entered is not a mobile number, press the OK button, then use the arrow buttons to find the appropriate label, and press OK again.

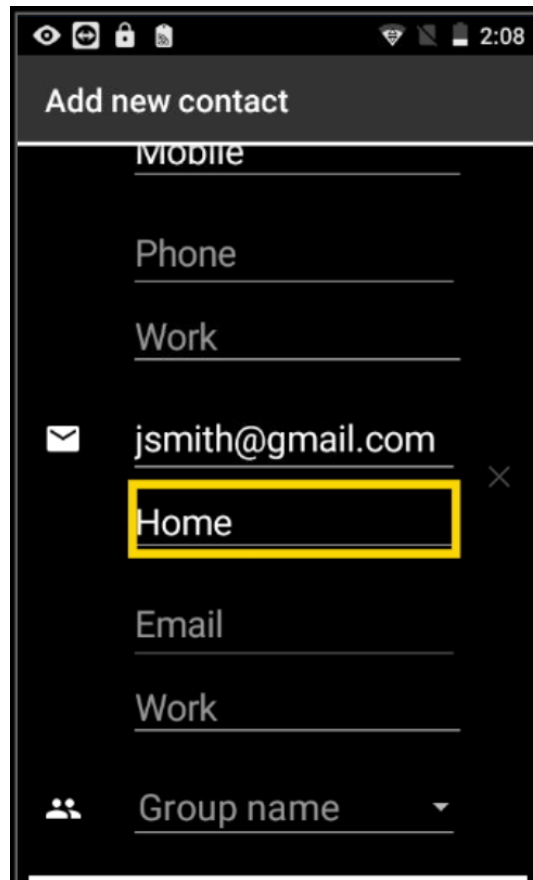

10) There will always be an additional blank space to add another phone number below the most recent number entered. You can use this space to add more numbers for the same contact by navigating to them and repeating steps 8 and 9, or you can continue navigating down past it

- 11) The next box is for an email address. Navigate to the Email box, press enter, and type in the email address

- 12) Similar to phone numbers, there is a descriptive label for email addresses as well, located below the corresponding email address. If the correct label is not already selected, press the OK button, use the arrow buttons to find the correct label, and press the OK button again to choose that label

13) Much like the phone number section, there will always be a blank space to enter an additional email address below the most recent one entered. Repeat steps 11 and 12 here to enter an additional email address, or continue navigating down if you have entered all relevant email addresses for this contact

14) Arrow down to Save and press the OK button

Congratulations, your new contact will now be saved!
